

How to Train Your Dragon: Prompt Engineering

Game Documentation for Host and Players

1 OVERVIEW

How to Train Your Dragon: Prompt Engineering is a live classroom AI image challenge where students study a dragon image, write prompts, generate their own dragons, and compete through voting and ranking.

2 OBJECTIVES

- Develop careful observation skills.
- Practice clear and creative prompt writing.
- Encourage imaginative thinking and visual creativity.
- Build comparison, evaluation, and critical thinking through peer voting.

3 ROLES

Host: Manages the game from the host dashboard—creates games, controls rounds, generates images, opens voting, and reviews results.

Players: Join the game on their phones using a QR code or join code and submit prompts each round.

4 GAME FLOW SUMMARY

- 1 Host creates a game from the landing page.
- 2 Students join using the QR code or join code.
- 3 **Round 1 – Create Your Dragon:**
Students write prompts to generate their own dragon images.
- 4 **Round 2 – Train the Scene:**
Students build a scene or background for their dragon using new instructions.
- 5 **Round 3 – New Challenge:**
A new instruction is given and the same process is repeated.
- 6 **Final Winners:**
After the last round, winners and rankings are shown at the bottom of the host screen.

Figure 2. Host Dashboard

Important: Each image generation takes about **1–2 minutes**. Please be patient while the system generates the images.

Host Guide

Step-by-step instructions for the game facilitator

1 Open the homepage and create a host game.

2 Show the QR code and join code so players can join.

3 Wait for players to appear in the Players panel.

4 Click **START GAME** to begin the round and show the challenge image.

5 Click **OPEN** so players can type their prompts.

6 Wait for all players to submit.

7 Click **CLOSE** after all submissions are in.

8 Click **GENERATE IMAGES**.

9 Wait about **1–2 minutes** while the images are generated.

10 If voting is part of the activity, click **OPEN VOTING** and later **CLOSE VOTING**.

11 If AI scoring is used, click **AI SCORE IMAGES**.

12 Click **RECOMPUTE RANKINGS** to update the rankings.

13 Review the generated images in the **Results Arena**.

14 Enter the next challenge instruction and click **ADVANCE ROUND**.

15 Repeat the same process for Round 2 and Round 3.

Reminder: Players cannot type until the host presses **OPEN**.

Remember: Final winners appear at the bottom of the host screen after the last round.

Player Guide

What students do on their phones

1 Scan the QR code or enter the join code.

Use your phone to join the game from the host dashboard.

2 Wait for the host to start the round.

You will see the round title and status on your phone.

3 Study the dragon challenge image carefully.

Take time to notice the details in the image.

4 Wait for the host to press OPEN.

Submissions open when the host presses the **OPEN** button.

5 When submissions are open, type a clear and detailed prompt.

Describe the dragon and the scene as specifically as you can.

6 Submit your prompt once.

Tap **SUBMIT**. You cannot edit it later.

7 After submission, your prompt becomes LOCKED and cannot be edited.

You can review it, but it is final.

8 Wait about 1–2 minutes while your dragon is generated.

Please be patient while the system creates the images.

9 View your generated dragon and score if shown.

Your dragon will appear when it is ready, along with your score or rank.

10 Watch the host screen for rankings, the next round, and the final winners.

Follow along to see how you did and what comes next.

now locked

Figure 3.
Dragon generated –
view your score

Tip: Good prompts describe the dragon's **color, wings, pose, background, lighting,** and **scene.**

Reminder: Be patient.
Every generation takes about **1–2 minutes.**

Round Structure and Important Reminders

Game Documentation for Host and Players

1 ROUND FLOW OVERVIEW

Each round follows the same flow. Follow these steps in order to keep the game running smoothly.

2 ROUND SUMMARY

- Round 1: Create Your Dragon**
Players write prompts to generate their own dragon images.
- Round 2: Train the Scene**
Players write prompts to generate a scene or background using their dragon.
- Round 3: Same process as Round 2**
Repeat the scene training with a new instruction.
- Finals**
Final winners are displayed at the bottom of the host screen.

Figure 1. Results and Status Overview

Important Reminder
After all submissions, generate the images and then click **RECOMPUTE RANKINGS**.

Please Be Patient
Each generation takes about **1-2 minutes**, so please be patient.
